

ERIKS Solutions for Maritime Applications

Let's make industry work better

ERIKS

ERIKS helps to turn the tide

Late docking time? Delayed vessel completion? ERIKS has a complete understanding of the maritime industry, the equipment it employs and the demands of classification and legislation. ERIKS has the products, expertise and resources to help. When time isn't on your side, ERIKS is.

ERIKS is committed to meeting your needs

Whether it is a key equipment failure or a missing part in shipbuilding – when you need a situation resolved you need it resolved quickly. ERIKS has the know-how and capability to get your port back in operation, vessel back on schedule quickly and efficiently.

Global network – Local to you

Our business incorporates numerous group companies in multiple countries around the globe. We have a dedicated local team with national stocks and the support of worldwide ERIKS' network, so you can get the right parts, to the right place, at the right time.

ERIKS is a synonym for quality

Our hallmark is quality. From design to testing; from supply to after-service; from manufacturing to innovation, ERIKS is entirely focused on providing you, the customer, with excellence in all that we do.

Leading brands

- Industry's leading brands – including ECON valves
- All products to recognised international maritime standards

High product reliability

- Comprehensive technical datasheets
- Product traceability
- Quality management/quality control capabilities

Quick supply

- Large stock of core range of seals, gaskets and valves
- Urgent and just-in-time delivery

Application know-how

- Over 75 years of product and market experience
- Specialists 24x7 on hand to advice on the most appropriate solution

Efficient logistics

- On-site warehouse
- VMI service
- EDI supply solutions

Efficient logistics

- Reduction of suppliers and stock holdings
- Minimised off-hire time

ERIKS is your place to be for valves

One of the best-known suppliers of valves to the maritime industry is ERIKS' company Econosto. ERIKS supplies standard valves from stock as well as sourcing customised items for special projects – all to recognised international maritime standards.

Superior solution Ball valves

Ball valves take a leading role in the maritime industry. The high flow capacity coupled with being very simple to mechanise make our ball valves ideal for many applications.

Versatile and easy-to-use Gate, globe & check valves

Gate, globe & check valves can handle all types of media, such as oil, gas and steam. Our high performance valves are an excellent choice for all kinds of applications.

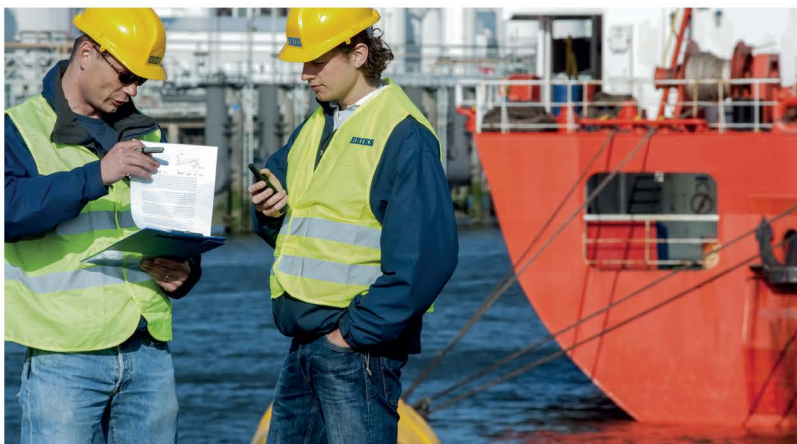

Compact but precise Butterfly valves

The compact design, the large capacity and the preciseness give butterfly valves broad applicability in the maritime industry. Our butterfly valves are an economic solution on which you can build.

The options are many Extensive range of valves

In our range we also have our unique double block and bleed valves, the zero leakage diaphragm valves and the safety relief valves for extreme pressure applications.

When time isn't on your side,
we are

ERIKS can help to make your job easier, your vessel or fleet more efficient, and your business more profitable. Whether you need replacement parts for your scheduled maintenance or for a breakdown, or techniques to help you plan for one and avoid the other, ERIKS has the industry know-how, the passion for technology, and the breadth of resources, to meet your needs as quickly as possible.

Contact our dedicated sales team now for an initial discussion of how we can help to turn the tide in your favour.

Facilities and capabilities

- Vast stock of valves from a range of manufacturers
- Dedicated maritime team
- Application engineering advice
- Work within the guidelines of the International Association of Classification Societies (IACS)
- Operate to SOLAS, IMO and MARPOL standards and regulations where applicable

ERIKS eases your process control

Whatever vessel type or process through your port, the need for full process control is essential to maintain strict schedules. ERIKS offers a broad range of instruments for measuring, monitoring and controlling level and flow. All are supplied according to international standards.

Ensure precision with valve automation Actuators

Valve actuators with its accessories as limit switches, valve positioners etcetera take an increasing place in process and operating systems. ERIKS provides ECON and AMG pneumatic and electric operated valve actuators for all type of valves.

For full control Level gauges

ERIKS provides magnetic and reflex gauges for use within the maritime industry for tanks containing flammable liquids and tubular gauges which are commonly used for the water storage and coolant tanks. Our liquid level gauges meet the requirements of SOLAS and are approved by many worldwide shipping authorities.

ERIKS has all the knowledge needed for valve automation. In our workshop our well-trained technicians assemble and test valves with all kinds of automation accessories.

econ®

Rely on ERIKS: Leader in seals for years

Since 1952, ERIKS has been at the forefront of sealing technology. Through our commitment to quality we earned the reputation as a premier seal supplier for multiple industries. We consider it a challenge to advise, develop and produce the optimum seal for every application.

Think O-rings - Think ERIKS

After the invention of the O-ring in the early 50's of the last century, ERIKS was one of the pioneers to bring this product to the world market. We provide a wide assortment with one goal: to offer you the best solution with the perfect seal.

Facilities and capabilities

- 15,000 different o-ring dimensions on stock
- 9,000 moulds to produce oil seals
- Complete range of hydraulic seals
- Rubber solutions
- Material Technology Centre
- Rapid prototyping
- In-house engineering
- Quality assurance

ERIKS is your reliable gasket partner

We are a dynamic, market leader in design, manufacture and supply of essential gasket and insulation products. Our in-depth knowledge of gasket products and maritime applications enable us to provide solutions for every flange connection.

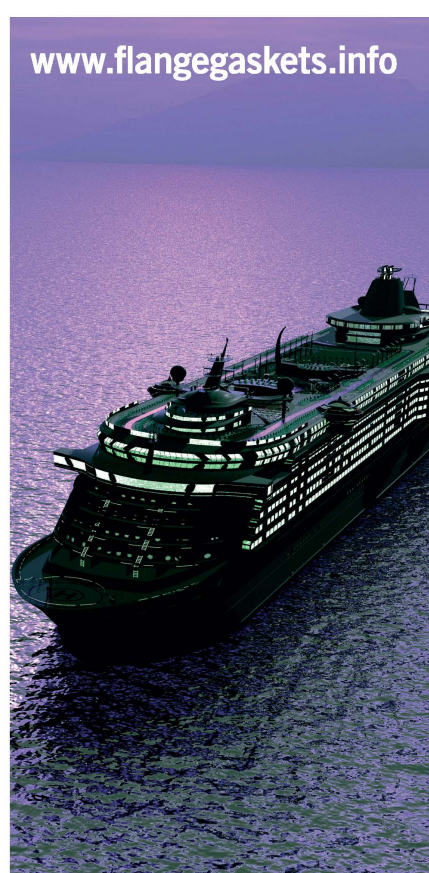

Excellence ensured Flange gaskets

ERIKS has a comprehensive base materials stocks, including fibre, rubber, graphite, paper and cork gaskets. Our local manufacturing facilities can ensure rapid customising.

High temp/pressure (Semi-)metallic gaskets

Our range of metallic and semi-metallic gaskets – RTJs, spiral wound, kammprofile and corrugated gaskets – are an excellent choice for your high temperature and high pressure applications.

ERIKS' plastics: the ultimate in corrosion resistance

ERIKS supplies PVC & CPVC pipes, fittings and valves according to international standards. Our range of plastic products is excellent for all maritime DWV applications. PVC & CPVC pipes are corrosion resistant for potable water, wastewater treatment and drainage systems and sea water desalination.
